Eye & Contact Lens 29(4): 272–276, 2003

© 2003 Contact Lens Association of Ophthalmologists, Inc.

Subject Index—Volume 29

Aberration correction, soft contact lenses and, postlens tear film importance in, S182
Acanthamoeba
  attachment to silicone hydrogel contact lenses, S41
  keratitis associated with, atypical presentation in noncontact lens wearer, 21
Acuvue
  7-day continuous wear, corneal thickness results after, comparison with tisilfocon A continuous wear, 10
  extended-wear contact lenses, comparison with Menicon Z continuous wear, S149
Adhesion, *Pseudomonas aeruginosa* and *Staphylococcus epidermidis*, hydrogel contact lenses and, S105
Artificial tear solutions, preserved, for dry eye, cost comparison study, 238
Astigmatism
  glass fragments and, rigid gas-permeable lens for treatment of, case report, 193
  irregular, reverse-geometry contact lens fitting after penetrating keratoplasty and, 44

Bacterial binding
  corneal epithelial cell, contact lens care solutions effects on, 27
  to corneal epithelium, daily-wear *vs.* extended-wear contact lenses, S14
Bifocal contact lenses, new designs in, S180
Biocompatibility, intraocular lenses, 155
Bleb formation, corneal endothelium, rigid gas-permeable and soft lens comparison, 234
Blepharitis, contact lenses and, S93
Bullous keratopathy, lotrafilcon A soft hydrogen contact lenses and, S54

Carboxymethyl cellulose, used prior to contact lenses treated with cationic disinfecting agents, cytoprotective properties, 177
Cataracts
  intraocular lenses, biocompatibility of, 155
  tinted spectacle lenses effects on visual performance, 17
Chemistry, surface, continuous-wear contact lenses, S30
Children, topical cyclosporine in keratoplasty, 103
Chromatography, high-performance liquid, lysozyme deposit curve determination in soft contact lenses, 79
Ciprofloxacin, interaction with silicone *vs.* conventional contact lenses, 83
Cleaning/disinfection, contact lenses, college student/health care workers self-evaluation, 164
Colored filters/lenses
  cosmetic, ocular complications associated with, 196
  daily wear opaquely tinted hydrogel soft contact lenses, contrast sensitivity effects, 48
  ethnicity effects on color choices, women, 93
  over-the-counter cosmetic colored contact lenses (editorial), 195
  tinted spectacle lenses, visual performance effects in subjects with cataracts, 17
Conjunctival surface, soft contact lens effects on, 230
Conjunctivitis
  allergic, olopatadine hydrochloride and, comfort evaluation, 113
  erosive, punctal stenosis secondary to docetaxel, 134
  giant papillary, contact lens chemistry and, S37
  papillary, silicone hydrogel contact lenses and, S186
Contact lenses
  bifocal
    new designs in, S180
    refitting after monovision lens wear, 181
  care routine, economic/social factors role in compliance with, 210
  care solutions
    exfoliation and bacterial binding to corneal epithelial cell and, 27
    saline *vs.* polyvinylpyrrolidone, 38
  chemistry of, giant papillary conjunctivitis and, S37
  color choices, ethnicity and, women, 93
  comfort response, rigid *vs.* soft hypertransmissible, S127
  comparison with refractive surgery, 201
  continuous wear, benefits of, S147
  continuous wear of, rigid *vs.* soft hypertransmissible, S127
  continuous-wear
    new advanced in (editorial), S1
    popularity and future use predictions, S166
    surface chemistry and wearability, S30
  corneal endothelial bleb formation and, rigid gas-permeable and soft lens comparison, 234
  corneal infiltrates associated with, 146
  corneal refractive therapy and orthokeratology, literature review and recent findings, S49
  corneal thickness and corneal curvature effects during usage of, 223
  cosmetic, ocular complications associated with, 196
  daily disposable, infectious keratitis and, case report, 185
  daily wear
    bacterial binding to corneal epithelium and, comparison with extended-wear lenses, S14
    opaquely tinted hydrogel soft, contrast sensitivity effects, 48
  development and safety, U.S. FDA role in, S160
  disinfecting solutions, protection against *Pseudomonas aeruginosa*, 100
  disposable
    giant papillary conjunctivitis and, S37
    hydrogel *vs.* silicone hydrogel, goblet cell density comparison, 241
  dry eye and, S96
  extended-wear
    bacterial binding to corneal epithelium and, comparison with daily wear lenses, S14
    corneal endothelial morphology after Menicon Z continuous wear trial, 14
    corneal thickness results after tisilfocon A *vs.* ACUVUE continuous wear schedules, 10
    high-Dk soft, clinical signs of hypoxia, S22
    high-oxygen and low-oxygen soft, subjective experience, 55
    high-oxygen *vs.* low-oxygen permeable soft, comparison study, 50
    Menicon Z, continuous wear schedule, clinical trial, 2
    oxygen role in corneal epithelial homeostasis, S2
    rigid gas-permeable, corneal epithelial proliferation recovery time, 61
    tear turnover and immune/inflammatory processes and, S80
  eyelid disorders and, S93
  eyelids and tears role in success of, S115
  frequent-replacement
    corneal thickness changes in, 23
    giant papillary conjunctivitis and, S37

future trends in, S192
gas-permeable
corneal epithelial proliferation recovery time and, 61
Menicon Z on continuous wear schedule, clinical trial, 2
reverse-geometry contact lens fitting after penetrating keratoplasty, 44
spherical RGP fitting of, pellucid marginal corneal degeneration and, nomogram for, 168
hard, eyelid mass caused by migration of, case report, 250
hydrogel, oxygen permeability of, 126
hypertransmissible, oxygen permeability of, S17
infection, mechanisms of, S67
Menicon Z *vs.* Acuvue, comparison study, S149
microbes, infiltrates, inflammation, and vascularization, relationship between, S83
microbial keratitis
daily *vs.* extended wear, S145
epidemiology and risk factors, S85
vision loss and, S131
multipurpose solutions, corneal staining and patient preference evaluation in, 213
30-night, safety assessment, S157
nonoxygen-related factors effects on performance, S57
over-the-counter cosmetic colored (editorial), 195
oxygen transmissibility, as performance indicator for practitioners, S26
peripheral ulcer induced by
causes and treatment of, S63
differentiating from microbial keratitis, 60
prion disease transmission by, risk assessment, S44
Pseudomonas aeruginosa adhesion to, quantification of, 65
Pseudomonas aeruginosa and *Staphylococcus epidermidis* interaction in adhesion to hydrogel and, S105
reverse-geometry fitting after penetrating keratoplasty, 44
rigid
lens fitting decline, S122
safety and features of, S119
rigid gas-permeable, astigmatism from glass fragments and, case report, 193
rigid *vs.* soft or LASIK, practitioner preferences, S143
saline *vs.* polyvinylpyrrolidone solutions, 38
silicone hydrogel
Acanthamoeba attachment to, S41
continuous wear, corneal infiltration risk factors, S153
continuous wear, *Pseudomonas* keratitis associated with, case report, 255
dryness and discomfort with, S101
lysozyme and lipid deposition on, S75
noninflammatory complications with, S186
oxygen reservoir and tear exchange in, S90
soft, therapeutic applications of, S54
therapeutic applications of, 72
in vivo dehydration of, 173
silicone *vs.* conventional, ciprofloxacin interaction, 83
soft
aberration correction and, postlens tear film importance in, S182
conjunctival surface effects, 230
high-oxygen and low-oxygen, subjective experience, 55
high-oxygen *vs.* low-oxygen permeable, comparison study, 50
hypoxia role in limbal vascular response to, S72
lysozyme deposit curve determination in, 79
postlens tear thickness, ocular and lens parameters effects on, S33
ultraviolet radiation blocking and, S174
spherical RGP fitting, in pellucid marginal corneal degeneration, nomogram for, 168
toric designs in, S171
treated with cationic disinfecting agent, carboxymethyl cellulose use prior to, cytoprotection and, 177
ulcerative keratitis and, 207
ultraviolet light absorption incorporation in, S190
wave-front guided, design principles and limitations of, S167
wear and care for, college student/health care workers self-evaluation, 164
Contrast sensitivity, opaquely tinted hydrogel soft contact lenses effects on, 48
Cornea
bilateral anesthesia, diaphragmatic paralysis, ovarian failure, and developmental delay associated with, case report, 262
contact lens-induced peripheral ulcer, causes and treatment of, S63
edema
Acanthamoeba keratitis in noncontact lens wearer, 21
therapeutic applications of lotrafilcon A contact lenses, 72
endothelial morphology after Menicon Z continuous wear trial, 14
infection, oxygen transmissibility as performance indicator for practitioners and, S26
infiltration risk factors, continuous wear of silicone hydrogel contact lenses, S153
metabolism, endothelial function and, hypoxia-induced corneal swelling and, 117
overnight orthokeratology and, 137
prion disease transmission by contact lenses, risk assessment, S44
refractive therapy, orthokeratology and, literature review and recent findings, S49
swelling, variability of, corneal metabolism variability and, S7
tear turnover and immune/inflammatory processes and, extended-wear contact lens use and, S80
thickness
after tisilfocon A *vs.* ACUVUE continuous wear schedules, 10
changes in, frequent-replacement contact lenses and, 23
and curvature, during contact lens usage, 223
Corneal degeneration
pellucid marginal, spherical RGP contact lens fitting in, nomogram for, 168
peripheral hypertrophic subepithelial, case report, 266
Corneal endothelium, bleb formation, rigid gas-permeable and soft lens comparison, 234
Corneal epithelium
bacterial binding to, daily *vs.* overnight wear effects on, S14
homeostasis, oxygen role during extended contact lens wear, S2
proliferation recovery time, after rigid gas-permeable contact lens wear, 61
surface exfoliation and bacterial binding to, contact lens care solutions effects on, 27
Corneal erosion
lotrafilcon A soft hydrogen contact lenses and, S54
silicone hydrogel contact lenses and, S186
therapeutic applications of lotrafilcon A contact lenses, 72
Corneal infiltrates
contact lens-associated, 146
contact lenses and, S83
Corneal surface, after injury, ciprofloxacin interaction with silicone *vs.* conventional contact lenses and, 83
Corneal swelling, hypoxia-induced, corneal metabolism and endothelial function, 117
Corneal ulcer
bilateral, diaphragmatic paralysis, ovarian failure, and developmental delay associated with anesthesia for, case report, 262
cosmetic colored contact lenses and, 196
orthokeratology and, morphology of, case report, 190

Creutzfeldt-Jakob disease, transmission by contact lenses, risk assessment, S44
Cyclosporine, topical, in pediatric keratoplasty, 103
Cytology, impression, soft contact lens effects on conjunctival surface and, 230

Dehydration, in vivo, silicone hydrogel contact lenses and, 173
Docetaxel, punctal stenosis secondary to, erosive conjunctivitis and, 134
Doxycycline, *Pseudomonas aeruginosa* corneal melting and, case report, 258
Dry eye
  contact lens wear and, S96
  preserved artificial tear solution costs, comparison study, 238
  silicone hydrogel contact lenses and, S101
  tear film thickness after warm compress treatment in meibomian gland dysfunction and, 96

Edema, corneal, therapeutic applications of lotrafilcon A contact lenses, 72
Edge effect, oxygen permeability of hypertransmissible contact lenses, S17
Editorials, S1, 1, 195
Encephalopathy, transmissible spongiform, contact lenses and, risk assessment, S44
Entropion
  lotrafilcon A soft hydrogen contact lenses and, S54
  therapeutic applications of lotrafilcon A contact lenses, 72
Epidemiology, 30-night contact lenses, safety assessment, S157
Ethnicity
  contact lens color choices and, women, 93
  postlens tear thickness, ocular and lens parameters effects on, S33
Exfoliation, corneal epithelial cell, contact lens care solutions effects on, 27
Eye environments, open-eye *vs.* closed-eye, tear turnover and immune/inflammatory processes and, extended-wear contact lens use and, S80
Eyelid disorders, contact lenses and, S93
Eyelid mass, migrated hard contact lens and, case report, 250
Eyelids, tears and, contact lens success and, S115

Flap striae
  after femtosecond LASIK, case report, 252
  RK4 lens fitting for, in LASIK patient, 76
Fluorosilicone hydrogel contact lenses, high-oxygen *vs.* low-oxygen permeable soft, comparison study, 50
Food and Drug Administration, contact lens development and safety role, S160

Goblet cell density, disposable hydrogel *vs.* silicone hydrogel contact lenses, comparison study, 241

Homeostasis, corneal epithelial, oxygen role in, extended wear of contact lenses and, S2
Hyperemia, hypoxia and, limbal vascular response to soft contact lenses and, S72
Hyperopia
  after LASIK, S135
  spherical, photorefractive keratectomy *vs.* LASIK for treatment of, 31
Hypoxia
  corneal
    after frequent-replacement contact lenses wear, 23
    contact lens-induced, variability of, S7
  corneal swelling induced by, corneal metabolism and endothelial function and, 117
  high-Dk soft lens extended wear, clinical signs of, S22
  limbal vascular response to soft contact lenses and, S72

Imaging, in vivo confocal microscopy, postlens tear thickness measurement, S110
Infection
  bacterial pathogens and irritants, innate defense of ocular surface, S10
  contact lens care routine and, economic/social factors role in compliance with, 210
  contact lenses and, mechanisms of, S67
  corneal infiltration risk factors, continuous wear of silicone hydrogel contact lenses, S153
  nosocomial, physician hygiene patterns in effects on, 221
Inflammation, contact lenses and, S83
Intraocular lenses, biocompatibility of, 155

Keratectomy, photorefractive, spherical hyperopia, comparison with LASIK, 31
Keratitis
  Acanthamoeba, atypical presentation in noncontact lens wearer, 21
  cosmetic colored contact lenses and, 196
  infectious, daily disposable contact lenses, case report, 185
  methicillin-resistant *Staphylococcus aureus*, after bilateral photorefractive keratectomy, case report, 187
  microbial
    contact lenses and, 146
    contact-lens related, epidemiology and risk factors, S85
    daily *vs.* extended wear contact lenses, S145
    diagnosis, differentiating from contact lens-induced peripheral ulcer, 60
    vision loss and, with contact lens wear, S131
  Pseudomonas aeruginosa adhesion to contact lenses and, quantification of, 65
  ulcerative
    contact lens wear and, 207
    30-night contact lenses, safety assessment, S157
Keratoconus
  bilateral, after LASIK, in keratoconus patient, 90
  bilateral keratoconus after LASIK in patient with, 90
  rigid contact lenses and, S122
Keratomileusis, laser in situ. *see* LASIK
Keratopathy, bullous, therapeutic applications of lotrafilcon A contact lenses, 72
Keratoplasty
  pediatric, topical cyclosporine effects, 103
  reverse-geometry contact lens fitting after, 44

LASIK
  bilateral keratoconus after, case report, 90
  femtosecond, flap folds after, case report, 252
  rejection demographics, educational seminar effects on, 69
  RK4 lens fitting for flap striae and, 76
  spherical hyperopia, comparison with photorefractive keratectomy, 31
  vision loss after, S135
  vs. rigid *vs.* soft contact lenses, practitioner preferences, S143
Lens, intraocular, biocompatibility, 155
Lipid deposition, lysozyme and, silicone hydrogel contact lenses and, S75
Lotrafilcon A contact lenses, therapeutic applications of, S54, 72
Lysozyme deposit curve, determination of, in soft contact lenses, 79
Lysozyme, silicone hydrogel contact lenses and, S75

Meibomian gland
  blepharitis and, contact lenses effects, S93
  dysfunction of, tear film thickness after warm compress treatment in, 96

Menicon Z
continuous wear, comparison with Acuvue extended wear, S149
continuous wear schedule, clinical trial, 2
Metabolism, corneal, corneal hypoxia variability and, S7
Microbes, contact lenses and, S83
Microscopy, confocal, postlens tear thickness measurement, S110
Mucin balls, silicone hydrogel contact lenses and, S186
Mucosal epithelium, innate defense of, bacterial pathogens and irritants and, S10
Myopia
after LASIK, S135
treatment of, current research and future trends, S139

Ocular surface, innate defense of, bacterial pathogens and irritants and, S10
Olopatadine hydrochloride, in allergic conjunctivitis, comfort evaluation, 113
Ophthalmology practice, physician hygiene patterns in, 221
Organic soil, multipurpose solutions antimicrobial activity in presence of, 245
Orthokeratology
corneal endothelial morphology after Menicon Z continuous wear trial, 14
corneal refractive therapy and, literature review and recent findings, S49
corneal ulcer related to, morphology of, case report, 190
overnight, visual and corneal changes, 137
Oxygen, hypoxia and, limbal vascular response to soft contact lenses and, S72
Oxygen permeability
hydrogel materials and water content, 126
hypertransmissible contact lenses, S17
Oxygen reservoir
eyelids and tears and, contact lens success and, S115
tear exchange and, silicone hydrogel contact lenses and, S90
Oxygen transmissibility
corneal epithelial homeostasis and, extended wear of contact lenses and, S2
corneal thickness changes after frequent-replacement contact lenses wear, 23
high-Dk soft extended-wear contact lenses, clinical signs of hypoxia, S22
as performance indicator for practitioners, S26

Pachometry, postlens tear thickness, ocular and lens parameters effects on, S33
Pain relief
lotrafilcon A soft hydrogen contact lenses and, S54
therapeutic applications of lotrafilcon A contact lenses and, 72
Patient satisfaction
comfort response, rigid *vs.* soft hypertransmissible contact lenses, S127
contact lenses, nonoxygen-related factors effects on performance, S57
continuous-wear contact lenses, popularity and future use predictions, S166
permeable soft contact lenses, high-oxygen *vs.* low-oxygen, 55
Phagocytosis, polymorphonuclear nucleocytes interaction with *Serratia marcescens* and, 108
Pirenzepine, myopia treatment effects, S139
Polymer, lens, *Acanthamoeba* attachment to silicone hydrogel contact lenses and, S41
Polymorphonuclear nucleocytes, interaction with *Serratia marcescens*, 108
Presbyopia, bifocal contact lens fitting after monovision lens wear and, 181

Prion disease, transmission by contact lenses, risk assessment, S44
Pseudomonas aeruginosa
adhesion to contact lenses, quantification of, 65
contact lens disinfecting solutions protection against, 100
contact lenses and, mechanisms of infection, S67
corneal epithelial cells and, contact lens care solutions effects on, 27
corneal melting, doxycycline effects, case report, 258
infectious keratitis associated with, daily disposable contact lenses and, case report, 185
keratitis, silicone hydrogel contact lenses and, case report, 255
Staphylococcus epidermidis and, adhesion to hydrogel and, S105
ulcerative keratitis in contact lens wearers and, 207

Radiation, ultraviolet, blocking of, soft contact lenses and, S174
Refractive surgery, contact lens comparison with, 201
Research, contact lenses, future trends in, S192

Salzmann nodular dystrophy, peripheral hypertrophic subepithelial corneal degeneration and, case report, 266
Serratia marcescens, contact lens isolates of, cellular ocular defenses and, 108
Solutions
artificial tear, preserved, for dry eye, cost comparison study, 238
contact lens care, exfoliation and bacterial binding to corneal epithelial cell and, 27
multipurpose
antimicrobial activity in presence of organic soil, 245
corneal staining and patient preference evaluation in, 213
saline *vs.* polyvinylpyrrolidone, comparison study, 38
Spectacle lenses, tinted, visual performance effects in subjects with cataracts, 17
Staphylococcus aureus
infectious keratitis associated with, daily disposable contact lenses and, case report, 185
methicillin-resistant, keratitis associated with, after bilateral photorefractive keratectomy, case report, 187
Staphylococcus epidermidis, *Pseudomonas aeruginosa* and, adhesion to hydrogel and, S105
Stenosis, punctal, docetaxel-associated, erosive conjunctivitis and, 134

Tear exchange, oxygen reservoir and, silicone hydrogel contact lenses and, S90
Tear film
postlens, aberration correction with soft contact lenses, S182
postlens thickness of
confocal microscopy measurement of, S110
ocular and lens parameters effects on, S33
thickness, after warm compress treatment in meibomian gland dysfunction, 96
Tear turnover, immune/inflammatory processes and, extended-wear contact lens use and, S80
Tears
dry eye and contact lens wear, S96
eyelids and, contact lens success and, S115
Tisilfocon A
continuous wear schedule, clinical trial, 2
corneal thickness results after continuous wear, comparison with ACUVUE 7-day schedule, 10

Ulcer
contact lens-induced peripheral
causes and treatment of, S63
differentiating from microbial keratitis, 60
microbial, vision loss and, with contact lens wear, S131
orthokeratology-related corneal, ulcer morphology in, case report, 190

Ultraviolet light, contact lenses absorption of, S190
Ultraviolet radiation, blocking of, soft contact lenses and, S174

Vision
  continuous wear contact lenses and, S147
  reverse geometry Contex OK lenses, overnight orthokeratology and, 137
Vision correction, rigid contact lenses, S119
Vision loss, microbial keratitis and, with contact lens wear, S131
Vision loss after LASIK, S135
Visual analog scales, silicone hydrogen contact lenses, dryness and discomfort and, S101

Water content
  oxygen permeability of hydrogel materials and, 126
  silicone hydrogel contact lenses and, 173
Wave-front guided design, of contact lenses, principles and limitations of, S167
